

Perform the activity:

Create a collage of several drawings, with your friends and family's opinions about what they think the Killer Robots are.

To perform this activity you can search for and show videos on YouTube to your friends and family about robots that bring and benefit humanity

(e.g. <https://www.youtube.com/watch?v=QgEW3M9qlgY>)

and killer robots or Lethal Autonomous Weapons Systems (LAWS)

(e.g. <https://www.youtube.com/watch?v=TlO2gcs1YvM&t=137s>).

After that, you can graphically represent the conclusions and opinions given by your friends and family.

Upload it to your social networks (Facebook, Instagram, Twitter) and post the hashtags:

- #TeamHuman
- #BanKillerRobots
- #YOUNGCOD3
- #KillerRobots
- #YouthSKR2020

It is IMPORTANT that you take screenshots of the activity that you uploaded to your social networks so that you can leave the evidence on the "Youth Against Killer Robots" website of your contribution to being an agent of change and transforming the spaces of humanity into scenarios of peace. (This process is very important to achieve your diploma and get your badge).

Note: If you don't have your own social networks, ask a friend or family member to share it on theirs, take screenshots and share it on the "Youth Against Killer Robots" website.
